To whom it may concern,

Hello! I am Ching Ping, you can also call me James. I enjoy thinking new ideas and turn it into reality. Therefore, I studied in graphic design when I was in the university. After graduating I felt like to learn more and expand my vision of design, so I came to Vancouver to study 3D animation.

With all the experience, I founded a company back in Taiwan. During the time, I learned how to run a company in many aspects, also improved my design skill in a practical way. Two years after, I had had another goal to achieve which is learning front-end development. Because of my start-up experience, I realized how important it is to be knowing computer language in this fast growing modern world. After some researching and self learning. I decided to come back to Vancouver to start my new journey as a programmer.

Currently, I am studying web and mobile application development in Cornerstone International College. As a student, I would like to use my spare time to gain some experience and learn more as a part-time intern. Although, I am still a beginner in programming area, I am learning rapidly. And with my design background, I believe I would be a asset to your company in the near future. Therefor, please contact me if you are interested in knowing more about me. Thank you for your time. I look forward to hearing from you soon!

Sincerely,
Ching-Ping Yang (楊敬平)
